

COOLSCULPTING Non-Invasive Fat-Reduction in Utah

 labelleviemedicalcare.com/coolsculpting-is-now-fda-approved-to-treat-a-double-chin

CoolSculpting™ is now FDA Approved to Treat a Double Chin

CoolSculpting™ is now FDA approved to treat a double chin. The makers of the revolutionary body contouring procedure recently announced the addition as a ***non-surgical neck lift treatment as another incredible substitution for liposuction***. A safe, no-knife cryolipolysis alternative is an exciting option for the estimated 70% of consumers who are bothered by excess fat and skin under the chin.

La Bell Vie Medical Care & Aesthetics in Draper, Utah is pleased to offer a ***safe and effective solution for the treatment of double chin and lax skin under the chin*** with CoolSculpting™ using the CoolMini™ applicator. Call today for your freeCoolSculpting™ consultation at 801-797-3865.

CoolSculpting™ to Permanently Eliminate Unwanted Fat

CoolSculpting™ has given individuals a safe and effective, non-invasive approach to permanently eliminate stubborn fat pockets like bra bulges and love handles. Since 2005 this revolutionary procedure has been the solution to safely target difficult pockets of fat that do not respond to diet and exercise.

CoolMini™ Treatment for a More Toned Chin

The CoolMini™ applicator has expanded the areas that can be treated. The specially-designed applicator is ideal for the submental area below the chin. Targeted fat-freezing technology with the CoolMini™ applicator will result in the ***improved appearance of submental fullness also known as double chin and tightened neck skin for a more toned appearance.***

How Does CoolSculpting™ Work?

Cryolipolysis, or fat freezing, works by using freezing temperatures to break down fat cells. Patented CoolSculpting™ treatment procedures ensure that the skin and underlying tissue is not damaged. Patients typically need one to three treatments for the best results, each treatment takes between 35 – 60 minutes.

CoolSculpting™ treatment for double chin begins with the placement of a protective gel pad and the CoolMini™ applicator set in place on the targeted submental area. ***The lax tissue is gently suctioned into a cup and controlled cooling begins to freeze the targeted fat cells.*** Your professional CoolSculpting™ practitioner will massage the area to break-up more fat cells to achieve up to 25% fat cell reduction per treatment.
